

A wider selection of vehicles tailored just for you.

AUTOTURN

With the User Subscription License (USL), users receive content updates to the software regularly. This release includes new and updated **27** manufacturer vehicles (MVL) and **149** standard vehicles (SVL) that provide you with an improved swept path analysis for your projects.

This content release includes new and updated manufacturer vehicles for the Cities – Passenger, Transit, Cargo Vans, Emergency, and Construction – Cranes vehicle libraries.

Additionally, there are new and updated regional standard vehicles from various European countries and vehicles conforming to Australian (APAC) and Mexican (AMERICAS) design guidelines.
