AUTOSTRIPE

AutoSTRIPE is used in multiple territories

Who?
- Road Striping Design Engineers

What?
- Road striping design software for North America, Australia and New Zealand market

Why?
- Produce road (paint) striping designs accurately, customisable for local standards

# Intelligent Road Marking Design Software

AutoSTRIPE is road striping and traffic management design software which allows engineers to produce road layout drawings quickly and easily in AutoCAD and MicroStation with localisation for the North American and Australasian regions.

TRANSOFT SOLUTIONS

AUTOSTRIPE AT A GLANCE

- Uses rule based road striping-ensuring compliance with Local Traffic standards
- Draws road stripes quickly saving you time
- Supplied with a comprehensive set of standards, MUTCD symbols, arrows and line types
- Supplied with road text font matching local Traffic Standards
- Multiple objects are drawn as 'Street Features' and can be edited as one
- Easy editing enables different proposed 'what if' designs to be tested quickly

A plan of restrictions and parking bays

WHY CHOOSE AUTOSTRIPE

AutoSTRIPE can be used to automatically label and calculate the quantities of each type of marking used, showing cost estimates where rates are available. To assist with safety audits or for public consultation, it will generate 3D views as a driver would see them. You can enhance your drawings with 3D features, allowing you to account for buildings, walls, trees, signs and pedestrian railings when checking sight lines. When you are done, AutoSTRIPE designs can be exchanged with other organizations.

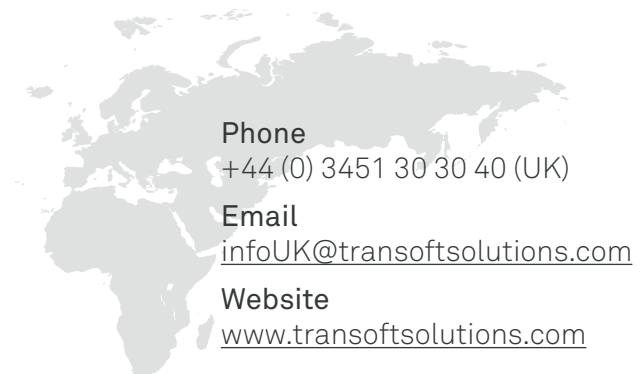

AutoSTRIPE Allows you to Draw Many Types of Road Markings

"I have never produced plans without AutoSTRIPE, and I wouldn't want to."
Janet Luessenheide City of Overland Park

ABOUT TRANSOFT SOLUTIONS

Transoft Solutions develops innovative and highly specialized software for transportation professionals in the aviation and civil infrastructure industry. Since 1991, Transoft has remained focused on software solutions that enable professionals to plan and design efficient and safe transportation infrastructure with confidence. Our portfolio of planning, simulation, modeling, and design solutions, are used in over 130 countries serving more than 50,000 customers across local and federal agencies, consulting firms, airport authorities, and ports. We take pride in providing best-in-class customer support from our headquarters in Canada, and through offices in Sweden, the United Kingdom, the Netherlands, Australia, Germany, India, Belgium, and China.
