

Design with Light Calculations Built in

Who?

- Traffic Management and Road Safety Engineers

What?

- Road Marking Design

Why?

- Produce road markings quickly, compliant with the regulations

Easy-to-use Road Marking Design Software

The UK's leading road marking and traffic management design software, KeyLines allows engineers to produce road marking and traffic management drawings quickly in AutoCAD.

KEYLINES AT A GLANCE

- Create road marking and traffic management drawings quickly
- Add BIM data to provide rich data models for analysis in Navisworks
- Automatic draping of road markings and street furniture on 3D surfaces
- Draw and edit complex markings as one
- Extract tables of quantities and estimate costs
- Transoft Solutions' support services include training, user group meetings and upgrades, to keep you up to date with standards and legislation

WHY CHOOSE KEYLIGHTS

KeyLINES offers a complete range of road markings to assist in the drawing of UK traffic management systems. These markings fully comply with the Traffic Signs Regulations and General Directions 2016 and enable you to follow the guidance set out in the Traffic Signs Manual Chapter 5. Full support for rich Building Information Models (BIM). Markings and street features include full data, and are automatically draped onto Civil 3D digital terrain and road corridor designs to provide fully realistic visualisations. Export your designs to IFC, GIS (SHP) or Navisworks.

“KeyLINES helped us draw a large volume of road markings from the M1 to the M62 with relative ease considering we had never used it before, in conjunction with KeySIGN it is a powerful combination.”

Michael Shepherd, Mott MacDonald

ABOUT TRANSOFT SOLUTIONS

Transoft Solutions develops innovative and highly specialized software for transportation professionals in the aviation and civil infrastructure industry. Since 1991, Transoft has remained focused on software solutions that enable professionals to plan and design efficient and safe transportation infrastructure with confidence. Our portfolio of planning, simulation, modeling, and design solutions, are used in over 130 countries serving more than 50,000 customers across local and federal agencies, consulting firms, airport authorities, and ports. We take pride in providing best-in-class customer support from our headquarters in Canada, and through offices in Sweden, the United Kingdom, the Netherlands, Australia, Germany, India, Belgium, and China.
