KEYSCAPE | KEYSCAPE LT

3D Visualisation tools

Who?
- Landscape architects and landscape designers

What?
- A single solution that enables you to quickly create small or large landscape projects
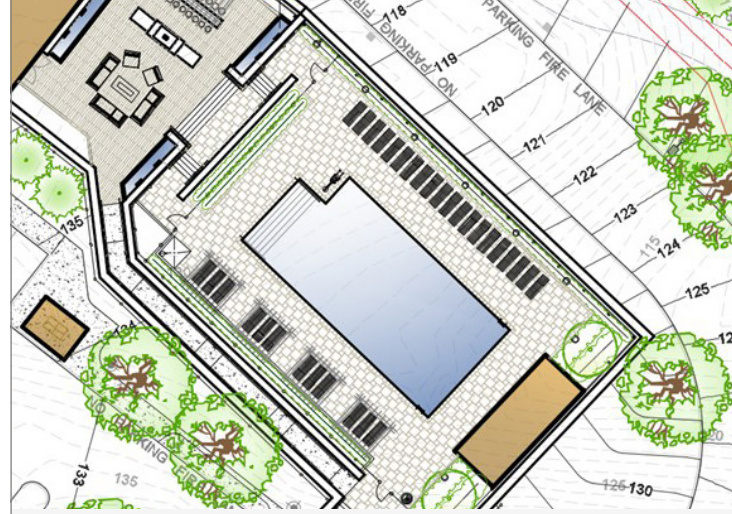

Why?
- Cuts your design time in half, eliminates errors and improves collaboration

Landscape Design and Ground Modelling Software

KeySCAPE is an add-on for AutoCAD which offers a comprehensive suite of tools enabling you to quickly create small or large landscape projects without the need for additional software.

TRANSOFT SOLUTIONS

KEYSCAPE AT A GLANCE

- Create ground models direct from point data contours
- Calculate volumes and optimise your site design
- Analyse your site for slopes, water run-off and flooding
- Assess and mitigate for the impact of new features to be placed within the landscape
- Database of over 8000 plants
- 3D visualisation and plotting tool

Create and Modify Planting Plans

WHY CHOOSE KEYSCAPE

KeySCAPE relies on a single source of the truth. Its extensive features inside one AutoCAD package mean there is no need to keep switching between multiple applications or maintain several copies of files in different locations, just create and edit once. This reduces the risk of error, saves you time and aids smooth collaboration on projects. The flexibility of KeySCAPE allows you to customise the system so workflows can be streamlined. Compliance to industry standards means more time can be spent designing and less time ensuring conformance.

Concept, sketch and detailed design
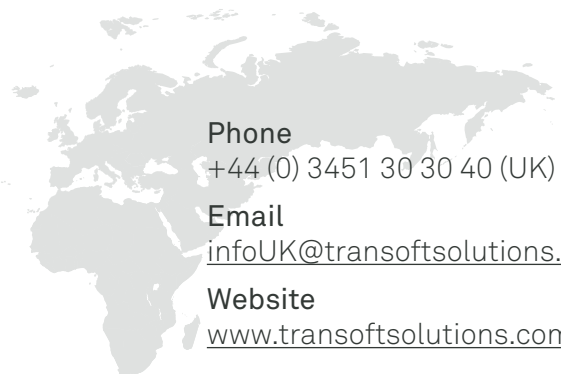

KEYSCAPE LT

KeySCAPE is available to run on the currently supported versions of AutoCAD and Windows and is available as a standalone application (KeySCAPE LT) that includes its own AutoCAD (OEM) engine.

"We have been really impressed with the flexibility that the KeySCAPE software provides in terms of tailoring graphics and specifications for individual projects."
Nicola Brown, David Huskisson Associates

ABOUT TRANSOFT SOLUTIONS

Transoft Solutions develops innovative and highly specialized software for transportation professionals in the aviation and civil infrastructure industry. Since 1991, Transoft has remained focused on software solutions that enable professionals to plan and design efficient and safe transportation infrastructure with confidence. Our portfolio of planning, simulation, modeling, and design solutions, are used in over 130 countries serving more than 50,000 customers across local and federal agencies, consulting firms, airport authorities, and ports. We take pride in providing best-in-class customer support from our headquarters in Canada, and through offices in Sweden, the United Kingdom, the Netherlands, Australia, Germany, India, Belgium, and China.
